Helpful Information: Changes: System Requirements: Turn on and off system sounds Windows Aero Sounds is a free application available for Windows XP and Vista users. The application provides support for easily adjusting/changing the sounds that Windows plays when you are moving or changing windows. The application features a simple-to-use window that can be used to enable/disable sounds as well as directly set default notification settings. You can change the default notification settings from the Control Panel. You can also configure how the sounds play when you are copying or moving the mouse around. In order to set notification settings you may use the following steps : Click the Start button. Type control panel in the search field. In the result list, click the Control Panel icon. In the System section, double-click Sounds. Open the Sound Tab. To change any of the default notification settings, open the Sound Settings, or click the Drop-down icon in the upper left corner of the Sound Settings window. Now click on each notification setting from the drop-down list. You can change the sounds that Windows plays when you move or move the mouse around. The listed options are all played simultaneously, so you should determine which sound needs to be disabled or deleted. Click the Clear All button to get rid of all the sounds, so that you can start fresh. Also, you can easily mute sounds when you want to use your computer in quiet mode, or you want to get rid of the annoying sounds that can ruin your day. The application also comes with a feature that allows you to quickly shut down your computer if you are in the middle of working and need to use the PC for other purposes. It's also possible to create your own sounds that are played when you change windows, move the mouse around, or move the mouse cursor over certain areas on the screen. To do so, you need to open the Settings window from the Sound Settings window, and then click the Create Button. Now go to the Sounds tab. If you wish to change the sounds that are played when you copy/paste certain items in notepad, you can do so by clicking on the Settings button. In this window, you will see a list of the sounds that are available. You can enable/disable the sounds that are played in this operation. Using the built-in feature that enables you to create your own sounds is quite easy and fun. There is also an option in
